The authors of the document do not claim any copyright over it. All the details, information, and content mentioned in the document are only for educational purposes under the 'fair use' policy. The content established below is in no way related to the personal ideologies of the Executive Board. This background guide is written with the sole intention of providing delegates with direction within the committee and orienting them to avenues of research.

1. Letter from the Executive Board

Greetings, Delegates,

It is our pleasure to welcome you to the Doomsday Committee at OAKJMUN 2026. Over the course of two days, prepare for intense debate, strategic manoeuvring, alliances, rivalries, and decisions that could determine the fate of the Marvel Multiverse.

Inspired by *Avengers: Doomsday*, our committee finds itself at the centre of an unprecedented multiversal crisis. As incursions threaten to tear apart realities and the Sacred Timeline stands on the brink of collapse, heroes from across universes must confront not only external threats, but also their own differences, loyalties, and ambitions. With Doctor Doom emerging as a formidable force, every decision carries consequences that could reshape the very fabric of reality.

Every character has their own motives, relationships, abilities, ideologies, conflicts, and ambitions, and it is up to you to bring them to life. This background guide is only the beginning of your research. We encourage you to understand your character beyond their powers: their history, motivations, alliances, rivalries, and place within the Multiverse.

For first-time delegates, do not be afraid to think beyond the established narrative. In a multiverse where every decision can create a new reality, there is no single path to success. Forge your alliances. Challenge the inevitable. Protect your reality.

The fate of the Multiverse lies in your hands. We look forward to seeing what you bring to the Marvel Universe at OAKJMUN 2026.

We strongly encourage you to conduct a **M.A.R.V.E.L. Analysis** of your assigned portfolio:

1. **Motivations:** Goals, fears, and ambitions.
2. **Alliances:** Allies, enemies, and factions.
3. **Relationships:** Key friendships, rivalries, and conflicts.
4. **Values:** Ideology, beliefs, and priorities.
5. **Events:** Key events shaping your character.
6. **Leverage:** Powers, resources, weaknesses, and influence.

"Know your character. Think like them. Shape the future."

Excelsior!

Best regards,

The Executive Board

2. MUN Rules Of Procedure (ROP)

1. Roll Call

- The Chair calls on each country to declare if they are "Present" or "Present and Voting." It refers to the voting procedure on the Draft Resolution, where a delegate can vote "Yes", "No", or opt to "Abstain".
- If "Present and Voting," the delegate cannot abstain from voting. If the delegate chooses to respond with "Present", they may answer with "Present and Voting" on subsequent days, but this is not permissible for "Present and Voting" as this reply must be used consistently from that point forth.

2. Setting the Agenda

- Delegates motion to set the agenda, followed by a formal debate on which topic to discuss first. This motion requires a simple majority to pass.

3. Speakers' List

- After passing a motion to enter formal debate, delegates are placed on a speakers' list to make formal speeches. Time limits are set, and the Chair calls on delegates to speak in order.
- A delegate must raise their placard if they wish to add their name to this list. They can be on this list only once on any occasion.

4. Points

- **Point of Order:** To correct a procedural error by the Chair.
- **Point of Personal Privilege:** For personal discomfort (e.g., if the room is too cold, or if a fellow delegate cannot be heard).
- **Point of Inquiry:** To ask questions about discussion or statements in committee.
- **Point of Parliamentary Inquiry:** To ask questions with regard to the Rules of Procedure.

5. Motions

- **Motion to Suspend the Meeting:** To break for caucuses or adjourn the session.
- **Motion to Close Debate:** Ends the discussion on a topic and moves to voting. Requires a two-thirds majority.
- **Motion to Table the Topic:** Postpones debate on a topic. Requires a majority vote.

6. Yields

- **Yield to the Executive Board:** A delegate yields their remaining time from their speech to the Executive Board. It is to be used as they see fit.
- **Yield to Another Delegate:** A delegate yields their remaining time for another delegate to speak. (This delegate's permission must be sought beforehand.)
- **Yield to Points of Information:** A delegate yields their remaining time to Points of Information to the committee.
- **Yield to Comments:** A delegate yields their remaining time to comments from the committee.

7. Caucuses

- **Moderated Caucus:** The Chair controls the speaking order with shorter, focused speeches. The topic selected is a narrowed version of the agenda, chosen by the delegate who proposed the moderated caucus.
- **Unmoderated Caucus:** Informal discussion among delegates not under the moderation of the Executive Board.

8. Draft Resolutions and Amendments

- Delegates collaborate to create draft resolutions, which are formal solutions to the discussed issue.
- **Friendly Amendments:** Accepted by all sponsors without a vote.
- **Unfriendly Amendments:** Need to be voted on to be added.

9. Voting

- **Procedural Votes:** Includes motions and amendments; all members must vote.
- **Substantive Votes:** For resolutions and unfriendly amendments; only "Present and Voting" delegates may vote, and abstentions are allowed.

10. Committee-Specific Modifications

The Doomsday Committee will primarily follow the UNA-USA Rules of Procedure, with the following modifications to suit the unique format of the committee. Where these conflict with the rules above, these take precedence.

- **Rules of Procedure:** The committee follows the UNA-USA Rules of Procedure unless otherwise specified by the Executive Board.
- **Crisis Updates:** The committee will receive one to two Crisis Updates per day. These introduce new developments, revelations, threats, and events that may significantly alter the course of the Multiversal Crisis.
- **No Directives:** Unlike a conventional crisis committee, directives will not be used. Delegates respond to developments through moderated debate, speeches, motions, negotiations, and voting.
- **Special Speakers List (SSL):** Instead of the conventional General Speakers List (GSL), the committee operates through a Special Speakers List. Delegates use the SSL to address the evolving crisis, present proposals, challenge opposing positions, and establish their character's course of action.
- **Multiversal Decision-Making:** Delegates are expected to deliberate collectively on the causes, consequences, and possible solutions to the incursions and the impending collapse of the Multiverse. Decisions taken by the committee may influence later Crisis Updates and the direction of the storyline.
- **Character Autonomy:** Delegates are encouraged to act in line with their character's established motivations, relationships, abilities, alliances, and ideological positions, while keeping enough flexibility to negotiate and respond to developments in committee.

"Prevent the incursion. Defy the inevitable. Save the Multiverse."

3. Sources and Hierarchy of Evidence

3.1 Accepted Sources

Official Marvel publications, comic issues, character profiles, films, and material from Marvel Studios and Marvel Entertainment will be accepted as primary sources. Under no circumstances will sources such as Wikipedia, fan wikis, Reddit, or unofficial Marvel blogs be considered valid evidence. That said, delegates are still free to quote or cite any source they see fit as part of their statements. Delegates are encouraged to verify information and prioritise official, canon Marvel sources wherever possible.

3.2 Hierarchy of Evidence

Evidence may be drawn from a wide range of sources, but not all sources carry equal weight. For this committee, evidence is ranked in the following tiers:

Tier	What it includes
Tier 1: Primary MCU Sources	Marvel Studios films, Disney+ MCU series, official MCU productions, and officially released Marvel Studios material. This tier carries the highest evidentiary value when establishing characters, events, abilities, relationships, and the current state of the MCU.
Tier 2: Official Marvel Supplementary Sources	Official Marvel Comics, MCU tie-in comics, Marvel handbooks, encyclopedias, character profiles, official timelines, and publications released or authorised by Marvel. These may be used to supplement information established in MCU productions.
Tier 3: Official Statements and Licensed Material	Interviews with Marvel Studios executives, directors, writers, and actors, official Marvel databases, promotional material, and other officially licensed publications. These may provide additional context on characters, events, and intended continuity.
Tier 4: Secondary Sources	Reputable entertainment publications, established news outlets, scholarly analyses, and well-sourced articles on the MCU and Marvel Comics. These may be consulted for context where primary or official sources are insufficient.

Tier 5: Fan Sources	Fan wikis, forums, Reddit discussions, YouTube analyses, social media posts, and other community-created content. These may be used for research and discussion but should not be treated as authoritative when they contradict official MCU sources.

4. Introduction to the MCU

The Marvel Cinematic Universe (MCU) is a shared fictional universe created by Marvel Studios, bringing together superheroes, civilisations, organisations, and cosmic forces across an interconnected narrative. Beginning with *Iron Man* in 2008, the MCU developed through interconnected films and television series, gradually expanding from individual superhero stories into a larger narrative involving cosmic threats, alternate realities, and the Multiverse.

The MCU's early storyline centred on the formation and evolution of the Avengers, following characters such as Iron Man, Captain America, Thor, Hulk, Black Widow, and Hawkeye. The conflict with Thanos culminated in *Avengers: Infinity War* and *Avengers: Endgame*, fundamentally altering the status quo of the universe and introducing a new generation of heroes.

Following the Infinity Saga, the MCU increasingly explored the Multiverse. Projects such as *Loki*, *Doctor Strange in the Multiverse of Madness*, *Spider-Man: No Way Home*, and *What If...?* established that multiple realities can exist at the same time, with different versions of familiar characters and events. This expansion brought concepts such as variants, incursions, alternate universes, and the Sacred Timeline to the centre of the MCU's mythology.

The MCU now spans heroes and factions from across Marvel's fictional universe, including the Avengers, the Fantastic Four, the X-Men, the Thunderbolts, Wakanda, Talokan, and other cosmic and terrestrial forces. Their histories, alliances, and conflicts increasingly intersect as the boundaries between universes come under threat.

"The Multiverse is vast. Every universe has a history. Every decision has consequences."

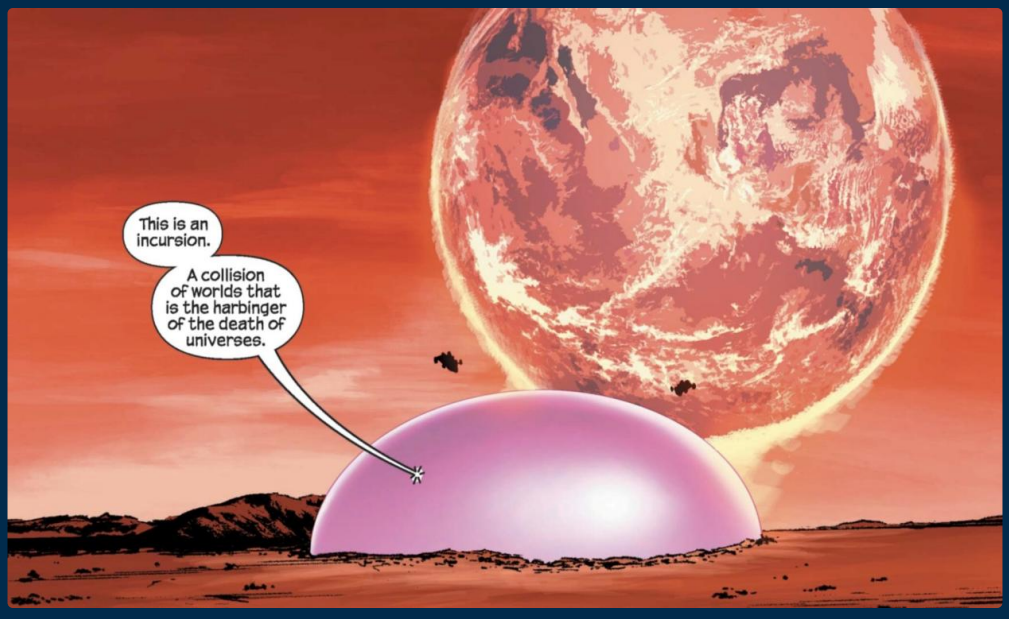

5. Agenda Overview

5.1 What Is an Incursion?

The concept of incursions represents one of Marvel's most significant threats to the structure of reality. Rather than a conventional invasion, an incursion happens when the boundaries separating two realities become dangerously unstable, putting the two universes on a collision course. In Marvel Comics, incursions became a central part of the *Avengers* and *New Avengers* storyline, in which entire worlds faced destruction regardless of the strength of their inhabitants.

The crisis raised a fundamental dilemma: if two universes are destined to collide, saving one may require actions that condemn the other. This turned the Multiversal Crisis from a battle against a single enemy into a question of survival, responsibility, and impossible choices.

> **Note**
>
> Marvel's official comics treat incursions as worlds or universes colliding and destroying one another. The *Avengers*, *New Avengers*, and *Secret Wars* storylines provide a much more developed version of the concept than the MCU has shown so far.

An incursion, Marvel Comics

"An Incursion occurs when the boundary between two universes erodes, and they collide, destroying one or both entirely."

5.2 Incursions in the MCU

In the MCU, the concept was explicitly introduced in *Doctor Strange in the Multiverse of Madness*, where Doctor Strange faces the consequences of actions taken across realities. The film establishes that crossing between universes can have consequences extending beyond the individuals involved. Clea's arrival at the end of the film indicates that Strange's actions have created a larger multiversal problem requiring intervention. This provides the foundation for the incursions the committee must address.

5.3 Why Incursions Are So Dangerous

The danger of an incursion lies in its scale and irreversibility. A conflict within one universe can potentially be contained; an inter-universal collision threatens the existence of the realities themselves. As more characters gain access to alternate realities, the possibility of interference, intentional or accidental, increases. The crisis therefore creates competing interests among heroes: some may prioritise preserving their own universe, while others may seek a solution that protects the Multiverse as a whole.

Incursions also create an opportunity for powerful individuals to influence the structure of reality. A sufficiently advanced understanding of the Multiverse could allow an individual or organisation to manipulate the conditions surrounding an incursion, turning a natural multiversal catastrophe into a deliberate instrument of power. This makes the investigation into the cause, mechanics, and escalation of the incursions as important as responding to their immediate consequences.

Incursion panel, Marvel Comics

"Incursion: Earth-616 : Earth-4,290,001" panel, Avengers (2012)

6. Historical Background

The following events establish the chain of developments that led the MCU toward its current multiversal crisis. The key distinction is that incursions are a concept established in Marvel Comics, while the MCU has established the conditions and consequences of multiversal instability through its films and series.

6.1 The Avengers and the Battle of New York (2012)

The formation of the Avengers showed that extraordinary individuals from different backgrounds could unite against a common threat. The Battle of New York also introduced humanity to extraterrestrial and cosmic forces, laying the foundation for the MCU's increasingly interconnected universe.

The Avengers after the Battle of New York, The Avengers (2012)

6.2 The Time Heist: Avengers: Endgame (2019)

The Avengers travelled to different points in their own history to retrieve the Infinity Stones. Although they ultimately returned the Stones to their respective timelines, the manipulation of time created circumstances that became crucial to the later emergence of branching realities.

The Time Heist team, Avengers: Endgame (2019)

6.3 The Escape of Loki: Avengers: Endgame and Loki

During the Time Heist, an alternate Loki escaped with the Tesseract, creating a divergent timeline. This variant was eventually captured by the Time Variance Authority (TVA), bringing the existence of branching timelines and the TVA's control over reality to the forefront.

Loki escaping with the Tesseract, Avengers: Endgame (2019)

6.4 The Revelation of the Sacred Timeline: Loki Season 1

Loki and Sylvie discovered that the TVA had been maintaining the Sacred Timeline and eliminating unauthorised branches. They eventually reached the Citadel at the End of Time and encountered He Who Remains, who explained that a previous multiversal war had occurred between variants of himself.

The Sacred Timeline branching, Loki Season 1

6.5 The Death of He Who Remains: Loki Season 1

Sylvie killed He Who Remains, removing the central figure who had been controlling the Sacred Timeline. This allowed previously suppressed branches to multiply and fundamentally changed the structure of the MCU's timeline. Following his death, countless branches began developing independently, and the MCU moved from a largely controlled timeline toward an increasingly complex multiverse of divergent realities.

He Who Remains at the Citadel, Loki Season 1

6.6 Spider-Man: No Way Home (2021)

Doctor Strange's attempt to help Peter Parker caused the boundaries between universes to weaken, allowing individuals from other realities to enter the MCU's universe. The incident showed that interactions between universes could have serious consequences.

Doctor Strange casting the spell, Spider-Man: No Way Home (2021)

6.7 Doctor Strange in the Multiverse of Madness (2022)

Doctor Strange and America Chavez travelled between multiple universes. The film established that incursions can occur when individuals interact across realities, and that such events can result in the destruction of one or more universes. At the end of the film, Clea revealed that Doctor Strange had caused an incursion and asked him to help resolve it. This is one of the MCU's clearest direct references to the phenomenon that threatens the Multiverse.

The Scarlet Witch, Doctor Strange in the Multiverse of Madness (2022)

6.8 The Multiversal War in Loki

The history revealed through the TVA established that alternate versions of powerful beings had previously fought across realities, culminating in a multiversal conflict. The TVA's existence was effectively a mechanism for preventing another such war.

The multiversal war, as shown in Loki

6.9 The Rise of Multiversal Variants

The increasing appearance of variants showed that individuals can exist in radically different forms across different universes. This includes variants of characters such as Loki, Doctor Strange, Spider-Man, and Kang-related figures, making the boundaries between individual realities increasingly significant.

Kang variants

6.10 The Expansion of Multiversal Contact

Events across the MCU increasingly connected previously separate realities and timelines. As characters gained the ability to travel between universes, manipulate timelines, or interact with variants, the possibility of larger-scale multiversal instability became increasingly relevant.

The multiversal tree, Loki Season 2

6.11 The Emergence of Doctor Doom

With Doctor Doom at the centre of *Avengers: Doomsday*, the multiversal crisis takes on a new dimension. His relationship with the Fantastic Four and his potential interest in controlling or exploiting the instability of reality make him a central figure in the crisis facing the heroes.

Doctor Doom, The Fantastic Four: First Steps (2025)

6.12 The Current Multiversal Crisis

The cumulative effect of timeline manipulation, branching realities, inter-universal travel, variants, and incursions has created a situation in which individual actions can have consequences far beyond a single universe.

MCU release-order chart leading to Avengers: Doomsday

7. Case Studies from the Comics

7.1 The First Incursion: Avengers #1–6 (2012–2013)

The modern Incursion crisis begins when the Avengers discover that the boundaries between universes are becoming unstable. The threat is not simply an invasion by another world; entire realities can be destroyed when two universes collide. The Avengers begin investigating the phenomenon while trying to understand whether

these events are connected to a larger force operating across the Multiverse. This establishes the Incursion crisis as a threat that cannot be solved through conventional superhero combat alone.

7.2 The Illuminati and the Incursions: New Avengers #1–6 (2013)

The Illuminati, made up of some of Earth's most influential heroes and leaders, secretly investigates the Incursion phenomenon. Reed Richards, Black Panther, Doctor Strange, Namor, Iron Man, Beast, and others are forced to confront an unprecedented dilemma: when two universes are destined to collide, protecting one reality may require sacrificing another. Their attempts to find a solution show the political and ethical consequences of an existential multiversal crisis.

7.3 The Great Society: New Avengers #16–17 (2014)

During the Incursion crisis, the Illuminati encounter the Great Society, a heroic group from another universe whose world faces destruction from an approaching Incursion. The Illuminati initially search for alternatives but eventually face the possibility that one universe may have to be destroyed to prevent both realities from being lost. The encounter becomes one of the most important examples of the moral consequences of the Incursion dilemma.

7.4 Namor and the Destruction of Another Earth: New Avengers #22 (2014)

As the Incursions become more frequent, Namor takes an increasingly extreme position. When the Illuminati hesitate to destroy an opposing Earth, Namor acts independently and destroys it to stop the Incursion from destroying both universes. His decision creates a major fracture within the Illuminati and shows how different characters can interpret the responsibility to protect their own reality.

7.5 Time Runs Out: Avengers #35–44 and New Avengers #24–33 (2015)

With the Incursions accelerating, the Marvel Universe enters a period known as Time Runs Out. The remaining heroes have only a limited amount of time to find a solution before the Multiverse collapses. Governments, superheroes, secret organisations, and rival factions begin pursuing different survival strategies. The storyline shows how an approaching existential deadline can turn cooperation into competition and force characters to choose between individual survival and the survival of reality itself.

7.6 The Builders and the Multiversal War: Avengers #6–23 (2013–2014)

While the Incursion crisis develops, the Avengers become involved in a larger conflict against the Builders, ancient cosmic beings whose actions threaten multiple civilisations across the Multiverse. The Avengers must operate far beyond Earth while dealing with political alliances, alien civilisations, and competing interests. This case study shows how a multiversal crisis can rapidly expand from a localised threat into a conflict involving entire civilisations.

7.7 The Black Swans: New Avengers (2013–2015)

The Black Swans are mysterious beings connected to the Incursion phenomenon and the larger multiversal conflict. Their knowledge of the Multiverse gives the Illuminati important information about the forces behind the crisis. Their presence also shows that not every participant in a multiversal conflict operates according to conventional heroic principles. Understanding the Incursions therefore requires investigating individuals and organisations whose motives may be unclear.

7.8 Rabum Alal: New Avengers (2013–2015)

Throughout the Incursion storyline, the Illuminati hear references to a mysterious figure known as Rabum Alal, associated with the destruction of universes. The identity and purpose of this figure become central mysteries as the crisis develops. The investigation shows how incomplete information can complicate decision-making during a multiversal emergency, and raises the possibility that the Incursions may be part of a deliberate process rather than random cosmic events.

7.9 The Beyonders and the Collapse of the Multiverse: New Avengers #30–33 (2015)

The Incursion crisis is ultimately connected to the Beyonders, immensely powerful beings whose actions contribute to the destruction of the Multiverse. The revelation changes the nature of the crisis: the heroes are not merely dealing with unstable realities but with forces operating on a scale beyond conventional cosmic powers. This case study is particularly relevant to Doomsday because it shows how an apparently uncontrollable multiversal phenomenon can have a deeper underlying cause.

7.10 Battleworld: Secret Wars #1–9 (2015)

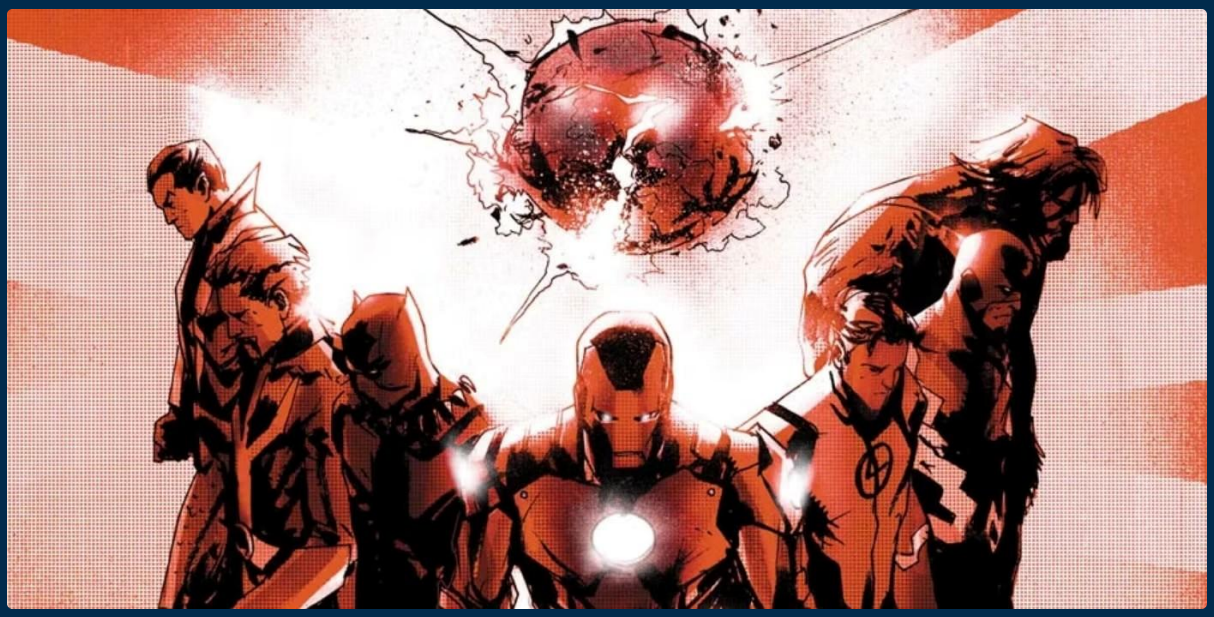

The collapse of the Multiverse culminates in *Secret Wars*, where the remaining fragments of destroyed realities are combined into a single world known as Battleworld. Doctor Doom becomes the central ruler of this new reality, with extraordinary control over its structure. Heroes from different universes are forced to confront a world in which the boundaries between realities have effectively disappeared. Battleworld represents the ultimate consequence of the Incursion crisis and is one of the most important comic-book precedents for understanding Doctor Doom's relationship with multiversal power.

7.11 Reed Richards vs. Doctor Doom: Secret Wars #9 (2015)

The final confrontation between Reed Richards and Doctor Doom is fundamentally about who should control the future of reality. Doom has used the remnants of the Multiverse to build Battleworld and establish himself as its ruler. Reed challenges Doom's control and ultimately helps restore the Multiverse. Their conflict is an important precedent for this committee because it sets two competing approaches to multiversal survival against each other: centralised control of reality versus restoring independent realities.

7.12 The Reconstruction of the Multiverse: Secret Wars #9 (2015)

Following Doom's defeat, Reed Richards, Franklin Richards, and other survivors take part in rebuilding the Multiverse. Rather than simply returning to the exact structure that existed before the crisis, the surviving reality is reconstructed with significant changes. This shows that even when a multiversal catastrophe is stopped, its consequences may permanently reshape reality.

The Illuminati, New Avengers (2013)

8. Key Factions in Doomsday

8.1 The Doom Faction: The Order of Doom

Member: Doctor Doom (Victor von Doom)

At the centre of the crisis stands Doctor Doom, whose presence connects the different groups involved in the multiversal conflict. The trailer material establishes Doom as the principal opposing force around which the heroes' response develops. Rather than functioning as just another super-powered combatant, Doom challenges the existing balance of power between Earth's heroes, mutants, cosmic forces, and the Fantastic Four. His scientific and technological abilities, combined with his established connection to Reed Richards in Marvel's mythology, make him particularly significant to the developing conflict. Marvel has also recently explored Doom's attempts to impose order through absolute rule in *One World Under Doom*, a useful comic precedent for understanding this faction.

Doctor Doom

Doctor Doom

8.2 The Fantastic Four: The Scientific Front

Members: Mr. Fantastic (Reed Richards), Invisible Woman (Sue Storm), The Thing (Ben Grimm), Human Torch (Johnny Storm)

The Fantastic Four form one of the most important groups in the Doomsday conflict because of their direct connection to Reed Richards and Doctor Doom. The trailers establish the team as an active part of the crisis rather than supporting characters. Reed's scientific understanding makes the team particularly relevant to questions about the Multiverse and the threat facing reality. Sue, Ben, and Johnny give the group both combat strength and a personal dimension to the conflict. Their position places them in natural strategic confrontation with Doom, while also giving them reasons to cooperate with the Avengers and X-Men when the survival of their reality is threatened.

The Fantastic Four, The Fantastic Four: First Steps (2025)

8.3 The Avengers: Earth's Established Defenders

Members: Steve Rogers, Thor Odinson, Peggy Carter, Captain America (Sam Wilson), Hulk (Bruce Banner), Captain Marvel (Carol Danvers), Spider-Man (Peter Parker), Hawkeye (Clint Barton), War Machine (James Rhodes)

The Avengers represent the established heroic response to the crisis. The Doomsday promotional material places Steve Rogers and Thor among the major returning figures responding to the emerging threat. Their faction brings together characters with decades of experience dealing with threats to Earth and the wider universe. Steve Rogers provides a traditional leadership perspective, while Thor and Captain Marvel bring experience with threats beyond Earth. Sam Wilson, Bruce Banner, Peter Parker, Clint Barton, Rhodes, and Peggy Carter add further perspectives on how the crisis should be confronted. The central question for this faction is whether the Avengers should focus on protecting Earth or become involved in a conflict threatening the entire Multiverse.

Heroes assembled, Avengers: Doomsday promotional still

8.4 The X-Men: The Mutant Front

Members: Professor X (Charles Xavier), Magneto (Erik Lehnsherr), Cyclops (Scott Summers), Beast (Hank McCoy), Nightcrawler (Kurt Wagner), Mystique (Raven Darkhölme), Wolverine (James Howlett), Gambit (Remy LeBeau), Deadpool (Wade Wilson)

The X-Men constitute another major power bloc in Doomsday. Their inclusion marks the arrival of mutant characters in the central multiversal conflict. Professor X, Magneto, Cyclops, Beast, Nightcrawler, Mystique, Wolverine, Gambit, and Deadpool bring different histories and approaches to survival, and their priorities may not always align with those of the Avengers or Fantastic Four. The faction therefore has to balance participation in the wider fight against Doom with protecting mutant interests and deciding what place mutants should have in the emerging multiversal order. The trailer's emphasis on the X-Men's return makes this one of the significant new dimensions of the conflict.

Professor X

Cyclops

8.5 The Wakanda–Talokan Coalition: The Sovereign Powers

Members: Black Panther (Shuri), M'Baku, Namor

The Wakanda–Talokan bloc represents powerful sovereign civilisations entering a conflict that extends far beyond ordinary international politics. Shuri and M'Baku bring Wakandan technological and military capabilities, while Namor represents Talokan's interests. Their participation means the Doomsday crisis is not only a conflict between superhero teams. These characters can approach the crisis from the perspective of protecting their people, territory, resources, and independence. The trailer's inclusion of Black Panther alongside the wider group of returning heroes reinforces Wakanda's involvement in the developing conflict.

Wakanda meets the Fantastic Four, Avengers: Doomsday promotional still

8.6 The Mystical Coalition: The Guardians of Reality

Members: Doctor Strange (Stephen Strange), Wong, Loki Laufeyson, Scarlet Witch (Wanda Maximoff)

This faction represents characters whose abilities and experiences connect them to magic, reality manipulation, and the deeper structure of the Multiverse. Doctor Strange and Wong have previously dealt directly with multiversal instability, while Loki's history places him in an unusual position regarding the structure of reality. Scarlet Witch's reality-altering abilities make her an exceptionally important figure in any crisis involving the fabric of existence. Unlike the Avengers, this group can approach the crisis from a supernatural and metaphysical perspective, potentially producing solutions unavailable to conventional science or military force.

Doctor Strange and Wong at Kamar-Taj

8.7 The New Avengers: The Covert Response

Members: Winter Soldier (Bucky Barnes), Black Widow (Yelena Belova), Red Guardian (Alexei Shostakov), U.S. Agent (John Walker), Ghost (Ava Starr), Sentry (Robert Reynolds)

The New Avengers represent the more covert and unconventional side of the heroic response. Bucky Barnes and Yelena Belova bring extensive experience with espionage and clandestine operations, Ghost contributes infiltration capabilities, and U.S. Agent brings a more institutional and militarised perspective. Red Guardian

adds another super-soldier perspective. Sentry makes this faction particularly significant because of his extraordinary power. Marvel describes Sentry as one of Earth's most powerful heroes while also emphasising the danger associated with the Void, making him a potentially unpredictable strategic asset.

The New Avengers, Thunderbolts (2025)*

8.8 The Next Generation: The Emerging Heroes

Members: Ant-Man (Scott Lang), Stature (Cassie Lang), Falcon (Joaquin Torres), Shang-Chi

This group represents the newer generation of heroes operating alongside the established powers. Scott Lang provides a connection to the original generation of Avengers, while Cassie Lang and Joaquin Torres represent heroes who have inherited responsibilities from previous generations. Shang-Chi adds another independent heroic perspective. Their position in the committee lets delegates explore whether younger heroes should simply follow the decisions of established leaders or develop their own strategy for the crisis.

Scott and Cassie Lang

Shang-Chi

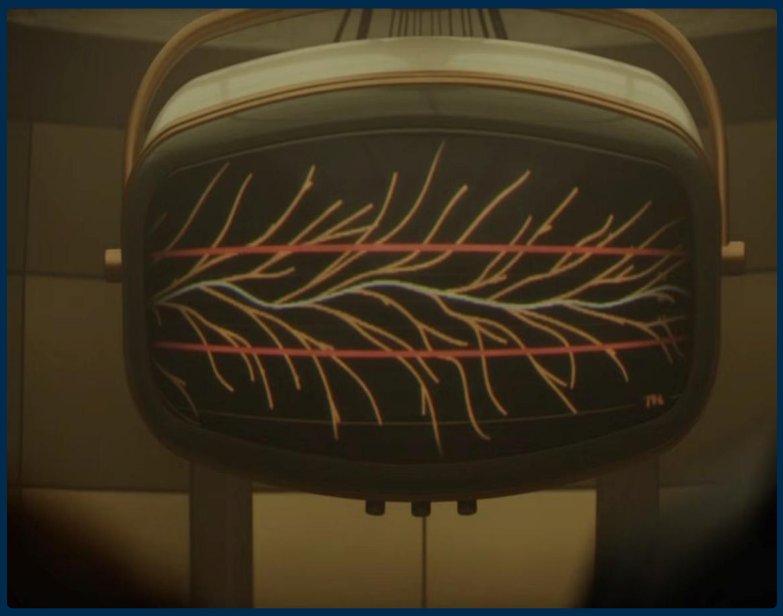

9. Glossary of Key Terms

The following definitions are provided to keep usage consistent across committee debate.

1. **Multiverse:** The totality of multiple universes and realities that exist within Marvel's cosmology. Each universe may contain different versions of characters, civilisations, and historical events.
2. **Universe:** A self-contained reality within the Multiverse. Different universes can have their own histories, versions of characters, and physical or magical laws.
3. **Incursion:** A catastrophic event in which two universes come into destructive contact, potentially destroying one or both realities.
4. **Sacred Timeline:** The term used in the MCU for the timeline controlled by He Who Remains. Its relationship with the wider Multiverse becomes increasingly complex as alternate timelines and realities emerge.
5. **Variant:** An alternate version of an individual who exists in another timeline or reality. Variants may have different histories, personalities, abilities, or allegiances.
6. **Timeline:** A chronological sequence of events within a reality. Changes to significant events can result in branching timelines and potentially create new realities.
7. **Branch Timeline:** A timeline that diverges from another because of a change in events or the actions of individuals.

8. **Reality:** A distinct plane of existence with its own history and inhabitants. In Marvel terminology, "reality" and "universe" are sometimes used interchangeably depending on context.
9. **Nexus:** A point, being, or phenomenon capable of connecting or influencing different realities.
10. **Nexus Being:** A being whose existence has an unusually significant influence on the stability or direction of a particular reality.
11. **Time Variance Authority (TVA):** An organisation associated with monitoring and managing timelines. The TVA became particularly important to the MCU's understanding of time, variants, and the Multiverse through *Loki*.
12. **Time Door:** A portal used by the TVA to travel through time and access different locations or timelines.
13. **Temporal Aura:** A temporal signature associated with an individual that can be used to identify and track them across timelines.
14. **Battleworld:** A world created from fragments of destroyed realities during the 2015 *Secret Wars* storyline. Doctor Doom becomes its ruler.
15. **Latveria:** The fictional European nation ruled by Doctor Doom and the political centre of his power.
16. **Illuminati:** A secretive group of powerful Marvel figures formed to address threats beyond the capabilities of conventional superhero teams. During the comic-book Incursion crisis, the Illuminati investigate ways to prevent the destruction of the Multiverse.
17. **Time Runs Out:** The final phase of Jonathan Hickman's *Avengers* and *New Avengers* storyline, during which the Multiverse approaches destruction and the heroes have increasingly limited options.
18. **Secret Wars:** A major Marvel Comics storyline in which the Multiverse collapses and surviving fragments are reorganised into Battleworld under Doctor Doom's rule.
19. **Beyonders:** Extremely powerful cosmic beings in Marvel Comics whose actions are connected to the destruction of the Multiverse and the events of *Secret Wars*.
20. **Multiversal Collapse:** The large-scale destruction or destabilisation of multiple universes, potentially destroying the Multiverse itself.

21. **Reality Manipulation:** The ability to alter the fundamental structure or conditions of reality. Scarlet Witch is one of Marvel's most prominent reality-manipulating characters.
22. **Cosmic Entity:** A powerful being operating on a cosmic or universal scale, often with abilities far beyond conventional superheroes.
23. **Earth-616:** The primary reality associated with the main continuity of the MCU. Other universes contain alternate versions of familiar characters.
24. **Alternate Reality:** A reality that differs from another universe because of different historical events, choices, or circumstances.
25. **Multiversal Threat:** A threat whose consequences extend beyond a single universe and potentially endanger multiple realities.

10. Research Guidance

10.1 Road to Doomsday

The following is the official MCU viewing path most relevant to understanding *Avengers: Doomsday*. Marvel has specifically described *The Fantastic Four: First*

Steps as leading directly into Doomsday, while Kevin Feige has highlighted the interaction between the Avengers, Fantastic Four, and X-Men in the film.

- **Avengers: Endgame (2019):** Establishes the post-Infinity Saga status of the Avengers and lays the foundation for the MCU's next generation of heroes. Important for understanding Steve Rogers, Thor, Bruce Banner, Carol Danvers, Clint Barton, and the wider Avengers legacy.
- **Loki Season 1 (2021):** Introduces the TVA, variants, branching timelines, and the wider structure of the Multiverse. Particularly important for understanding Loki and the consequences of disrupting established timelines.
- **Spider-Man: No Way Home (2021):** Shows how interference between realities can bring together characters from different universes. An important precedent for the interaction of alternate realities and variants.
- **Doctor Strange in the Multiverse of Madness (2022):** One of the most important films for understanding the Incursion concept in the MCU. Doctor Strange encounters alternate realities and learns that actions taken between universes can affect the stability of reality.
- **Loki Season 2 (2023):** Expands the MCU's understanding of timelines and the Multiverse. Particularly relevant to how multiple realities can coexist and what happens when the structure governing them breaks down.
- **Deadpool & Wolverine (2024):** Brings characters and elements from earlier Marvel film universes into the MCU's multiversal storyline. Especially relevant to the return of X-Men-related characters and Deadpool.
- **The Fantastic Four: First Steps (2025):** The most directly connected film before Doomsday. Marvel describes it as introducing Reed Richards, Sue Storm, Johnny Storm, and Ben Grimm to the MCU, and Kevin Feige has stated that the film leads directly into *Avengers: Doomsday*.
- **Avengers: Doomsday (2026):** The culmination of this stage of the Multiverse storyline, bringing together the Avengers, Fantastic Four, X-Men, and other major Marvel characters against the threat surrounding Doctor Doom. Marvel has confirmed the crossover between these groups as a major element of the film.

11. Questions a Resolution Must Address

Delegates are expected to engage with the following questions throughout debate and in their responses to Crisis Updates.

1. What is the underlying cause of the Incursions, and are they natural phenomena or deliberately engineered events?
2. How can the Sacred Timeline and the stability of individual universes be protected from further Incursions?
3. What conditions trigger an Incursion, and can the process be detected or stopped before two universes collide?
4. Who should have the authority to make decisions affecting the survival of entire universes?
5. Should a universe ever be sacrificed to prevent the destruction of multiple other realities?
6. How should the committee respond when the interests of one universe conflict with the survival of the wider Multiverse?
7. What measures should be taken to prevent individuals from deliberately manipulating or exploiting Incursions?

8. How should powerful beings such as cosmic entities, sorcerers, and reality-manipulating individuals be held accountable for multiversal damage?
9. Should travel and interference between universes be restricted during the crisis?
10. How can the committee distinguish legitimate multiversal intervention from actions that may destabilise reality further?
11. What role should scientific research and technological solutions play in understanding and preventing Incursions?
12. What role should mystical and cosmic knowledge play alongside scientific approaches to the crisis?
13. How should Earth-based heroes, cosmic civilisations, and inter-universal organisations coordinate their responses?
14. How should the committee respond if different universes develop competing strategies for survival?
15. What safeguards should be established against the concentration of multiversal power in a single individual or faction?
16. How should the committee respond to Doctor Doom if his actions are connected to the Incursion crisis?
17. What should happen to individuals who knowingly cause or accelerate an Incursion?
18. If the Multiverse cannot be completely restored, what principles should guide the reconstruction of reality?
19. How can the committee protect civilian populations and entire civilisations rather than focusing solely on powerful individuals?
20. What long-term framework can prevent another Multiversal Crisis after the immediate threat has been contained?
